

SOUTH WASHINGTON NATURAL GAS PROJECT

CONSTRUCTION FLYER
MAY 2022
MINNESOTA

Work Starting Soon

Natural gas line installation will occur on Hastings Avenue, between Pleasant Avenue and 1st Street. Construction will require a northbound shoulder closure. Two-way traffic will be maintained, parking will be restricted. Please note schedules are subject to change.

During construction you may notice:

- Road and sidewalk closures.
- Temporary changes to how you access your location.
- Traffic control.
- Construction noise.
- Parking restrictions.

We work to reduce construction-related inconveniences and will temporarily restore work areas following natural gas line installation. Final restoration will occur when conditions allow.

Overview

We are replacing 5.5 miles of natural gas lines along with multiple natural gas regulator stations to regulate natural gas pressure for the South Washington Natural Gas Project. Construction began in spring 2021 and is expected to be completed in fall 2022.

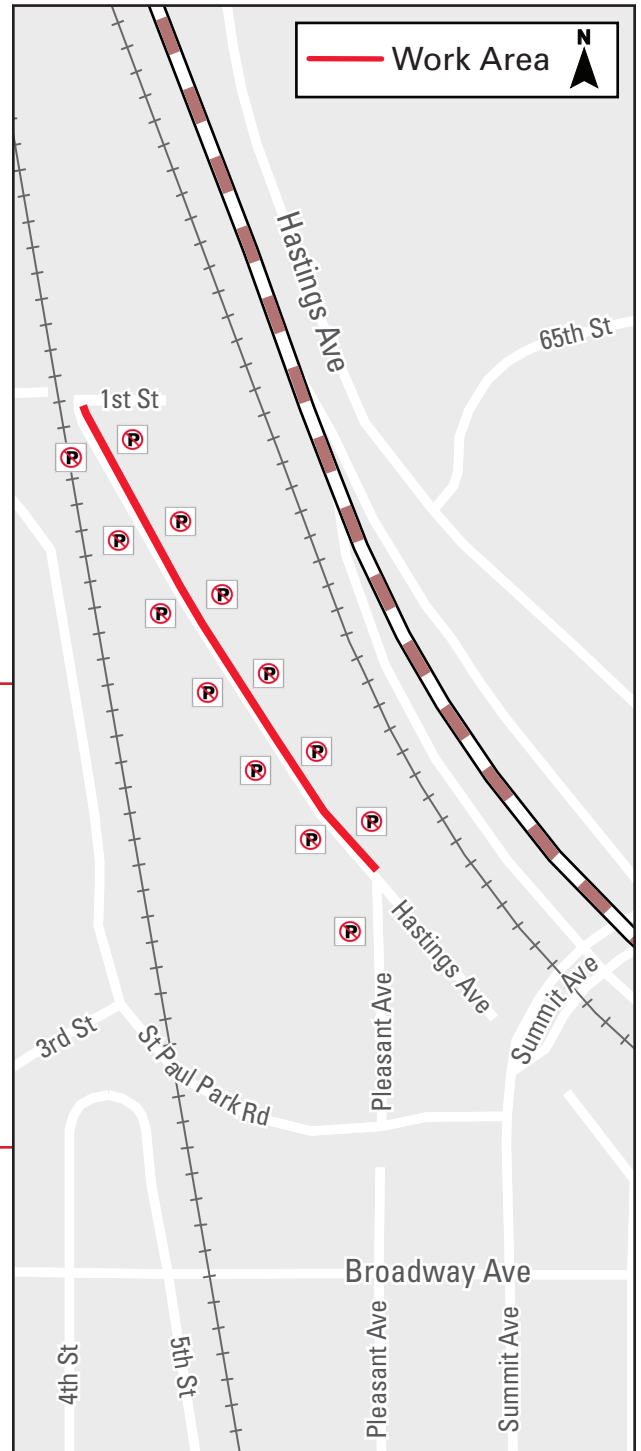

This work is our commitment to system revitalization, allowing us to continue to provide you safe, reliable service.

Safety

Public safety is at the foundation of all we do. The safety of the public around our natural gas system influences every decision we make.

If you suspect a natural gas leak, leave your home or business immediately. Once you are safely away, call **911**, then Xcel Energy at **800-895-2999**.
