

SOUTH WASHINGTON NATURAL GAS PROJECT

CONSTRUCTION FLYER

This map is a graphic and may not show exact locations.

Road closure to occur soon

Starting as early as Tuesday, Oct. 4, 2022, a full road closure will occur along Belden Boulevard/West Point Douglas Road, between Hadley Avenue and the Youth Service Bureau. The road will be closed for three weeks. A one-day closure of the intersection of Belden Boulevard and Hadley Avenue will occur during this closure. Construction schedules are subject to change.

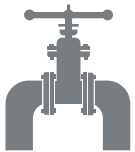

To access businesses along West Point Douglas Road, enter from Jamaica Avenue.

During construction, you will experience:

- Road and sidewalk closures.
- Traffic control.
- Temporary changes to how you access your location.

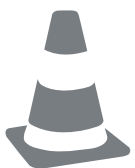

We work to reduce construction-related inconveniences and will temporarily restore work areas following natural gas line installation. Final restoration will occur when conditions allow.

Overview

We are replacing 5.5 miles of natural gas lines along with multiple natural gas regulator stations to regulate natural gas pressure for the South Washington Natural Gas Project. Construction began in spring 2021 and is expected to be completed in fall 2022.

This work is our commitment to system revitalization, allowing us to continue to provide you safe, reliable service.

Safety

Public safety is at the foundation of all we do. The safety of the public around our natural gas system influences every decision we make.

If you suspect a natural gas leak, leave your home or business immediately. Once you are safely away, call **911**, then Xcel Energy at **800-895-2999**.
