

SOUTH WASHINGTON NATURAL GAS PROJECT

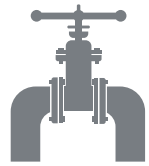

END OF CONSTRUCTION FLYER

Construction complete

Crews have completed construction and final restoration activities of the South Washington Natural Gas Project.

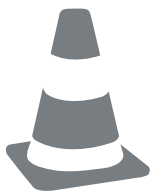

It was our pleasure to work in your community, and we thank you for your patience and cooperation.

Overview

We installed 5.5 miles of natural gas lines along with multiple natural gas regulator stations to regulate natural gas pressure in Washington County. Construction began in spring 2021 and was completed in fall 2022.

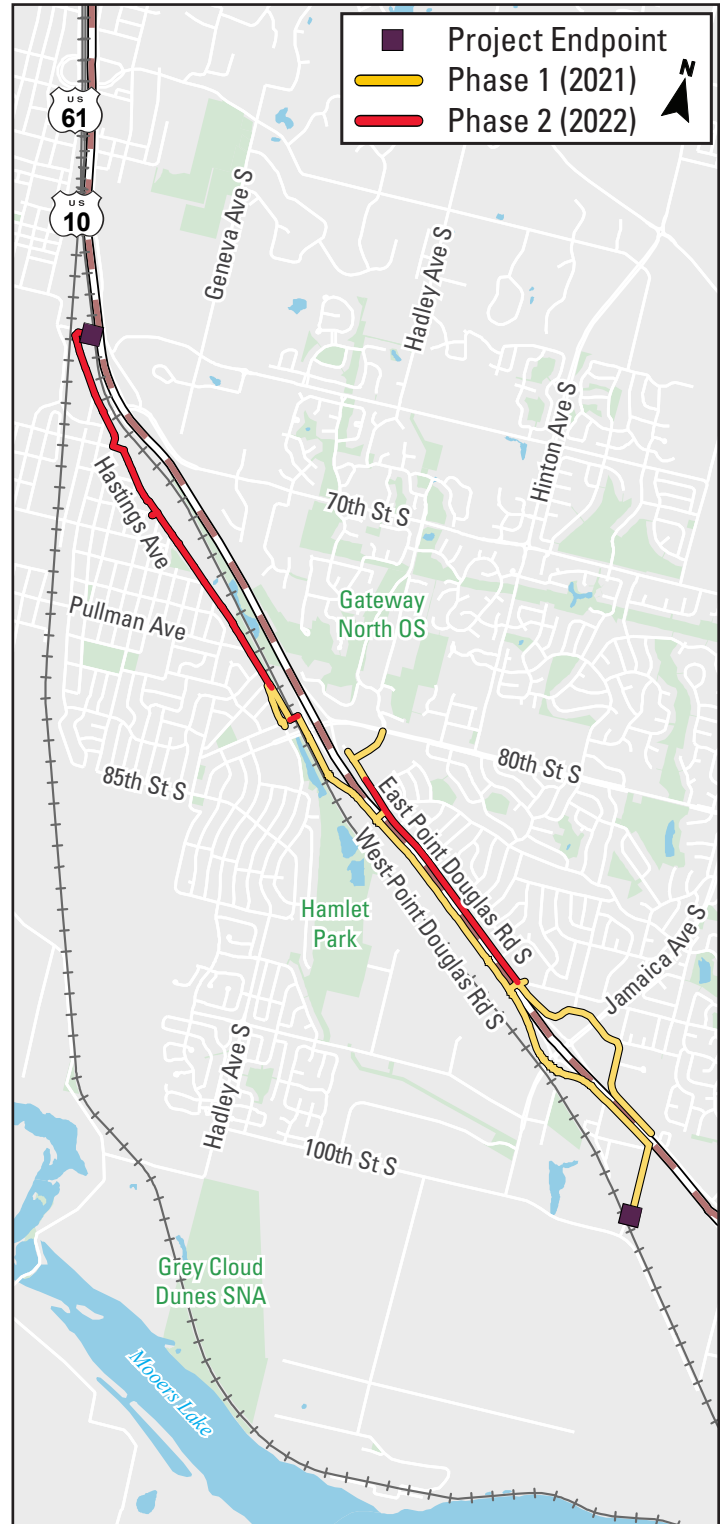

This work is our commitment to system revitalization, allowing us to continue to provide you safe, reliable service.

Safety

Public safety is at the foundation of all we do. The safety of the public around Xcel Energy's natural gas system influences every decision we make.

If you suspect a natural gas leak, leave your home or business immediately. Once you are safely away, call **911**, then Xcel Energy at **800-895-2999**.
